ABOUT ME

Backend developer focused on problem-solving, automation and product growth. Enjoy working close to the problem, understanding the user needs and delivering iterative improvements.
I build internal systems, automation flows and web applications that eliminate manual work and improve operational efficiency. Always learning, always shipping.
Stack: Python · Django · PostgreSQL · Node.js · React

PROFISSIONAL EXPERIENCE

I.T ANALYST
DOMMA INC.
Mar 2025 - PRESENT

- Development and maintenance of Domma's internal IT Asset and Inventory Management System (Python + PostgreSQL + CustomTkinter)
- Automated operational routines, replacing manual spreadsheet-based processes
- Centralized visibility of all IT assets and generated internal reports for decision-making
- Collaboration with multidisciplinary teams to deliver continuous improvements
- Delivered features aligned with business priorities using agile practices

---

I.T TECHNICIAN
INFINIX TECH TECNOLOGIA
Jun 2024 - Dec 2024

- Development of small web applications to support internal operations
- Technical support for corporate environments (remote & on-site)
- Configuration and diagnostics of hardware, networks and operating systems
- Equipment optimization and documentation of technical procedures

EDUCATION

UNIVERSIDADE VEIGA DE ALMEIDA
